

CAT BLADE HEAD

CAT BLADE Head

The Ultra-Spray CAT Blade head is designed for the PRISM Spray Coating System. The spray head consists of an ultrasonic transducer with a spray forming head and an integrated liquid applicator with air and liquid supply passageways.

Thin, Defect-Free Coating

- 0.25 to 5 mils thickness
- No bubbles
- No pin holes
- Excellent uniformity

Precision Coating Applicator

- Electronic Flow Control
- Up to 50 mm pattern width
- Precise start / stop

Nozzle-Free Spray Coating Technology

- Robust titanium coating head
- Non-clogging
- Maintenance-free
